HarmonyLine – Innovative Idea behind every-day reality

New colour variations designed especially for the Scandinavian market !

HarmonyLine it is a unique idea that promotes the same design of all elements from DAKO offer. The special value described under HarmonyLine is harmony and consistency of the products that allows to create aesthetic unity composed of windows, doors, garage doors and roller blinds.

Concrete steps make ideas alive. That is why we have designed 12 unique HarmonyLine compositions of windows, doors, garage doors and roller blinds, all of them available in 5 colour variations.
What is more, in Eunika composition we present 2 additional colour variations designed especially for the Scandinavian market.

By designing HarmonyLine compositions we have taken into account product colours, decorations of garage and exterior doors, types of roller blinds boxes and other elements that make the whole composition unique.

Aesthetic diversity of our products influences customers' imagination, helps them to choose the composition suitable for their house, and sometimes inspires them to create their own combination.

HarmonyLine:

- Shared design of windows, doors, garage doors and roller blinds
- Coherent colours of all products
- Adjusted patterns of garage doors and exterior doors
